DEEP WELL LABS

Turn one messy workflow into a clear next move.

DATA & AI WORKFLOW DIAGNOSTIC

Find the bottlenecks. See where AI and better data design can help. Leave with a practical plan for what to improve next.

$750

FIXED PRICE

One workflow. Clear scope.

BUILT FOR Small business owners, operations leads, BI/data managers and professional-services firms.

Sound familiar? Spreadsheet rework • Slow reporting • Copy-paste between tools

A small engagement. Tangible answers.

01 Focused discovery
60-90 minutes to understand one workflow, your tools and the friction.

02 Bottlenecks & opportunities
Identify rework and automation candidates, including where AI may not fit.

03 A practical demo
One demo or prototype using approved or synthetic data.

04 A grounded risk check
Review data, privacy and the points that need human approval.

05 A 2-page action plan
Recommended next steps, estimated effort and likely value.

06 3-business-day delivery
From discovery and receipt of agreed inputs to your diagnostic package.

HOW IT WORKS

1. **Discover** — Map one messy workflow.
2. **Demonstrate** — Test one promising slice.
3. **Decide** — Choose your next move.

CLEAR BOUNDARIES

Excludes production implementation, ongoing support, unlimited troubleshooting and security/compliance certification. Sensitive production data access requires separate scope.

OPTIONAL NEXT STEP

Implementation Sprint

$2,500-$4,000 for one bounded workflow, scoped separately after the diagnostic.

Bring us one messy workflow.

Ask about your $750 diagnostic.
